CSS transition

Saurabh Shukla (MySirG)

Agenda

- ① transition
- ② transformation

Transition

selector
{

transition: property time effect;

}

selector: pseudoclass

{

property : value;

}

same

A diagram consisting of two yellow arrows. One arrow starts from the word 'transition' in the first rule and points to the word 'same'. The other arrow starts from the word 'property' in the second rule and also points to the word 'same'.

Transform

transform : rotate(90deg);

: rotateX(90deg);

: rotateY(90deg);
