

Full stack web development using python

Django Installation

Saurabh Shukla (MySirG)

Agenda

- ① Django version
- ② checking python
- ③ checking PIP
- ④ checking Django
- ⑤ Installation

Django

You have to download the latest version of Django

4.1.7 (Latest version : Mar 2023)

visit djangoproject.com to know more about django.

How to check if Python is present in your system?

> python --version

or

> python3 --version

How to check if PIP is present?

> pip --version

or

> pip3 --version

How to check if django is present?

> `django-admin --version`

Installation

> pip install django

Recall

Library

↳ Packages

↳ modules

↳ variables
function
classes

Django packages is a directory of reusable apps, sites, tools and more.

Django is not a library but framework.
